Jackson and Madison County, TN Linux User Group (JaM-LUG)

A group for Linux users, Linux professionals and those who are curious about Linux.

"Tux" – The Linux Mascot

What is "Linux"?
Linux (also known as GNU/Linux) is a "free" operating system that can replace expensive Unix, Microsoft Windows and Apple OS X in many cases. Linux is more secure "out of the box" by default than Microsoft Windows. Linux does not need expensive, commercial "anti-virus" software to keep one "safe" from viruses. Linux has a world-wide community of users and professionals that can assist with answering questions and getting Linux working for you. In many cases this assistance is also "free". Come to the meetings to find out more.

What is a "Linux User Group"?
In this case it will be a group that meets at least once per month to discuss installing, configuring and using Linux operating systems and software for same on personal computers. This group will also be for discussing the advocacy of using Linux to businesses, friends and family. It will also provide a once per month informal help group that will give "free" assistance to those that are new to Linux near the end of each meeting. Occasionally the group will have a "Linux Installation Day" at one of the meetings to help new users get Linux installed and running on their hardware at the meeting. Linux professionals are encouraged to bring business cards.

Invitiation:
You are invited to attend JaM-LUG meetings every second Thursday of each month at 5:30 PM in the Library at First Presbyterian Church in Jackson, TN. The address is:

    1573 North Highland Avenue
    Jackson, Tennessee 38301

The Library is in the recreation building at the right rear of the church property, off of Coatsland Drive. Parking is behind and to the side of the main church sanctuary and the Dining Hall. To reach the rear parking area that is by the Dining Hall use the Coatsland Drive entrance The map below shows the location of First Presbyterian Church:

This document was created on Mandriva Linux using OpenOffice.org Writer and OpenOffice.org Draw. All "free" software.
